### **DETAILED ACTION**

Amendment filed on June 22, 2006 has been acknowledged. Claims 1-3,5-11 and 13 are pending.

#### ***Response to Amendment***

Rejection of Claims 1 and 4-6 as being anticipated by Miramanda has been withdrawn in light of applicants amendments.

Rejection of Claims 2, 3, 10-19, 23-25 as being unpatentable over Miramanda in view of Kezes et al. has been withdrawn in light of applicants amendments.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1, 10-11 and 13** are rejected under 35 U.S.C. 102(b) as being anticipated by Chang (US 4849173).

Chang teaches a specimen handling device. The device comprises a fluid-holding vessel (20) comprising an open end, a closed end and a side wall having an inner surface. (See Figure 1) The device further comprises a specimen retrieval (12) contained within the vessel (20) and a pierceable cap (4) fixed onto the open end of the vessel, wherein the cap (4) positions the specimen retrieval device (12) along the inner surface of the vessel (20), such that the specimen retrieval device (12) does not significantly interfere with the movement of a fluid transfer device/external needle either

into or out of the collection device. (See Col. 1, Lines 38-58) The cap (4) has generally a conical inner wall that includes a plurality of radially extending striations and the cap and the vessel (20) include mated threads (20b) and the cap is screwed onto the open end of the vessel. (See Figure 1)

***Allowable Subject Matter***

**Claims 2-3 and 5-9** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Prior art fails to teach or fairly suggest the specimen retrieval device is a swab member having a handle and the fluid transfer device is a plastic pipette tip.

***Response to Arguments***

Applicant's arguments with respect to claims 1-3, 5-7, 10-11 and 13 have been considered but are moot in view of the new ground(s) of rejection. Please refer above.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
